Education

Faculty of Computer and Artificial Intelligence **Sep. 2018 – Aug. 2022**
Bachelor of Computer Science – Grade: Excellent (H) *Benha, Egypt*

Summary

Computer Science graduate with hands-on experience in both offensive and defensive cybersecurity. Experienced in Web, Mobile, and Active Directory penetration testing, and currently gaining practical SOC experience through security monitoring, alert investigation, and incident response in an enterprise environment. Completed the Hack The Box Web Penetration Tester path and leverage a strong software development background to identify security vulnerabilities and improve system security.

Experience

Cyber Security Analyst Intern **Aug. 2026 – Present**
Telecom Egypt *Cairo, Egypt*

- Participating in SOC operations, monitoring security events, and investigating alerts under the guidance of senior analysts.
- Gaining hands-on experience with SIEM, incident response workflows, and threat analysis in an enterprise environment.

IT Operations Specialist **Feb 2026 – Present**
Samco National Construction Company *Nasr City, Egypt*

- Delivered first-line IT support, resolving user issues related to accounts, email (Outlook/Office 365), printers, and network connectivity.
- Provisioned and maintained user devices, including hardware setup, software installation, and system configuration.
- Managed IT assets and inventory, including equipment tracking, preparation for new hires, and secure disposal of outdated devices.

Penetration Testing Trainee **Nov. 2025 – Jan. 2026**
We Innovate Academy & ZeroSploit Company *Cairo, Egypt*

- Performed black-box and gray-box penetration testing across Web, Mobile, and Network environments simulating real-world attack scenarios.
- Identified and exploited server-side and client-side vulnerabilities, including injection flaws, access control issues, and business logic weaknesses.
- Analyzed Android applications for security flaws such as insecure data storage and hardcoded secrets using tools like Frida and JADX.
- Prepared professional penetration testing reports with risk assessment (CVSS) and clear remediation recommendations.

Freelance Mobile Application Developer **Jan. 2024 – Oct. 2025**
Android & Multiplatform Developer *Remote*

- Developed cross-platform applications using Kotlin Multiplatform (KMP) and Jetpack Compose for Android and iOS clients.
- Applied Clean Architecture (MVVM) with Koin/Hilt for dependency injection and Retrofit/Ktor for networking.
- Improved application security by implementing encrypted local storage and secure authentication using Firebase.

IT Support Specialist **May 2024 – Jul. 2025**
National Company for Telecommunication Services *Obour City*

- Managed Windows domain environments, enforcing patch compliance and access control policies.
- Troubleshot network and system issues, reducing recurring incidents and improving system stability.

SKILLS

Penetration Testing: Web (OWASP Top 10), Mobile (OWASP Mobile Top 10), Active Directory (Kerberoasting, Golden Ticket, Lateral Movement), Network Security.
Security Tools: Burp Suite, Nmap, Metasploit, Wireshark, BloodHound, Impacket, Kerbrute, ffuf, Frida, JADX, Drozer, SysReptor.
CTF Platforms: HackTheBox, TryHackMe.
Programming: Python (Scripting & Automation), Kotlin, Java, Dart.
Technologies: Jetpack Compose, Kotlin Multiplatform (KMP), Firebase.
Environment: Linux (Kali, Ubuntu, WSL), Docker, Git, Bash Scripting.

CERTIFICATIONS & COURSEWORK

Hack The Box: Web Penetration Tester Path – 100% completion (CWES-aligned training).
TryHackMe: Advent of Cyber 2025 – Completed Advanced Side Quests.
Google: Cybersecurity Professional Certificate; IT Support Professional Certificate.
Meta: Android Developer Professional Certificate.
